

WPA SECURE

LidarVision-ready mounting & accessories

Accessory Catalogue

Mounting systems for Lidar sensors & peripheral equipment

Precision mounting. Engineered for demanding security deployments.

WPA Secure designs and manufactures a comprehensive portfolio of mounting accessories for Lidar-based security systems — including brackets, interchangeable sensor heads, adapters and protective covers. All components are produced exclusively in WPA Secure facilities using aerospace-grade aluminium alloys with anodized (Elox) surface finishing — available in multiple colour options upon request.

Product Families

- Lidar sensor brackets & mounts (wall / pole / corner / tripod)
- Interchangeable sensor heads for multiple Lidar models
- Adapters and installation kits
- Weather shields & protective covers
- Special custom mounts for unique deployments
- Spare parts and field-service accessories

NOTE: This catalogue is a living document and will be updated with complete product listings and drawings.

LidarVision-ready mounting & accessories

Manufacturing & Materials

Built for field deployment and long-term durability

Aerospace-grade aluminium alloys

Anodized surface finishing (Elox)

Precision machining & repeatability

Designed for LidarVision deployments

Customisation: WPA Secure provides configuration variants and bespoke designs for non-standard installations (restricted spaces, special poles, structural constraints, or multi-sensor rigs).

Ordering & Enquiries

How to request part numbers, variants and custom designs

To place an order or request a quotation, please contact WPA Secure and include the following information:

- Lidar sensor model (vendor + type)
- Mounting type (wall / pole / corner / tripod)
- Required orientation (azimuth / elevation) and installation constraints
- Preferred anodized colour (optional)
- Quantity and delivery destination

WPA Secure will propose the recommended configuration and provide part numbers and drawings.
